### **ONLY TOP QUALITY DISTILLATES**

Specializing in the most reliable and efficient distilling, the batch still is designed for medium to small sized distilleries that produce top quality distillates (schnapps from grapes or fermented fruit, brandy, grappa).

Manufactured with refined production techniques, using selected materials whose nature and characteristics comply with the strict quality standards that have always inspired.

Used for manual or automatic cycles with monitoring of the main stages of the process, temperature optimization, degree of exhaustion and head and tail separation.

Can be equipped to operate in a vacuum and the various components are structurally balanced in a line that is attractive and compact.

Has already won numerous important customers who have chosen it for their production and the certainty of our professional standing.
